INSTALLATION SERVICES ARE ABLE TO PROVIDE

We specialise in:

- Low voltage electrical installations
- Lighting systems.
- Air conditioning and heating
- Fire protection systems
- Ventilation and Extraction systems
- Telecommunication networks, voice and data.
- Alarm and security systems.
- Plumbing.

Distribution

Maintenance services are able to provide:

Routine maintenance to minimize downtime. Services visits planned weekly, monthly, quarterly or coinciding with company schedules.

Engineers check equipment regularly to recommend updates. Engineers can be supplied on site for small project jobs.

Repair or conveyor equipment: boom, under the belt and line axis, mechanical bulls, PPT.

As well as control systems, we can also provide adequate training where and when necessary. Preventative and corrective maintenance on request.

ABOUT OUR CONSULTANCY AND ENGINEERING

We are doing electrical product design works, preliminary projects for residential, commercial buildings, agricultural industries, hotels and clinics as well as CAD consultants in electrical engineering for large multinationals. We have a strong design team with more than 15 years of experience.

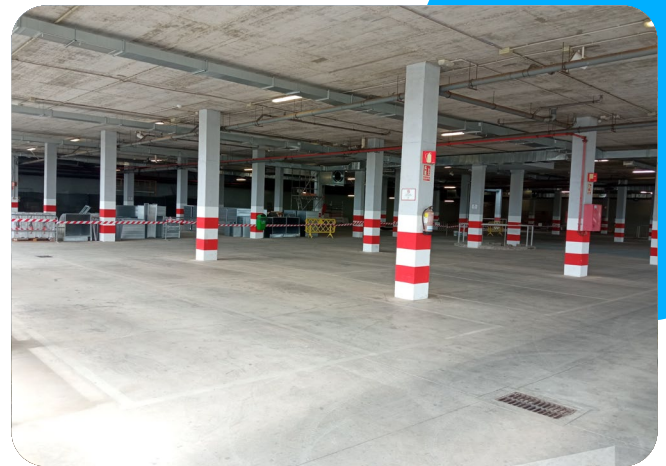

Our members are professionally qualified and have in-depth experience in design, shop drawing, preparation and calculations of air conditioning, electrical, plumbing and fire extinguishing systems.

Hospital Inside

Inside Ventilation

Parking Ventilation

Hospital Valle del Gualhorce, in Malaga, Spain

Our services for building and civil works would be as follows

MECHANIC

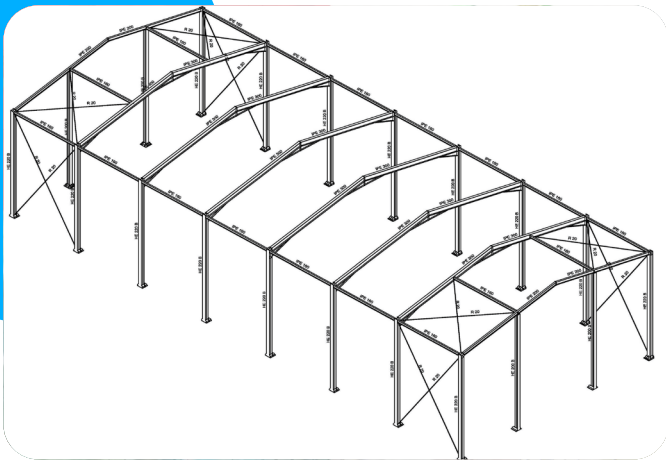

- Air conditioning designs
- Ventilation designs
- Industrial buildings
- Metallic Frame

Foundation Lining

ELECTRICAL

- Lighting distribution
- Power distribution (Low Voltage)
- Fire alarm system design
- Fire extinguishing design (piping)
- Emergency lighting layout (UPS lighting)
- Distribution boards
- Single-line electrical diagrams (Low Voltage)
- Electrical load panels. Medium and Low Voltage.
- Power distribution, (Medium and High Voltage).
- Specifications of poles and load panels.

Metallic Frame

Scrapyard , in Malaga, Spain

COMPANY VALUES AND CODE OF ETHICS

a) Honesty:

Considered a fundamental moral value, honesty establishes internal interpersonal relationships among the members of the organization based on trust, sincerity, and mutual respect.

b) Trust:

Defined as the confidence in fulfilling our commitments to our clients, taken seriously and responsibly.

c) Respect:

Regarded as an essential value that enables us to build trusting relationships with our clients, serving as a vital condition for effective communication and successful results.

d) Service Attitude:

We strive every day to meet our clients' needs, addressing these requirements in terms of time, cost, and quality.

e) Teamwork:

We work toward a shared goal and support each other in achieving it together.

f) Project Management:

We have interdisciplinary teams across various business areas with the experience necessary to ensure the successful development of a multitude of projects.

Vane-Driven Wind Generator

OUR STRUCTURE

We are constantly adding skilled personnel with the knowledge and experience to develop high-demand projects in the industrial, commercial, and institutional sectors. We currently cover electrical engineering, finite element analysis for stress and certification, and mechanical engineering.

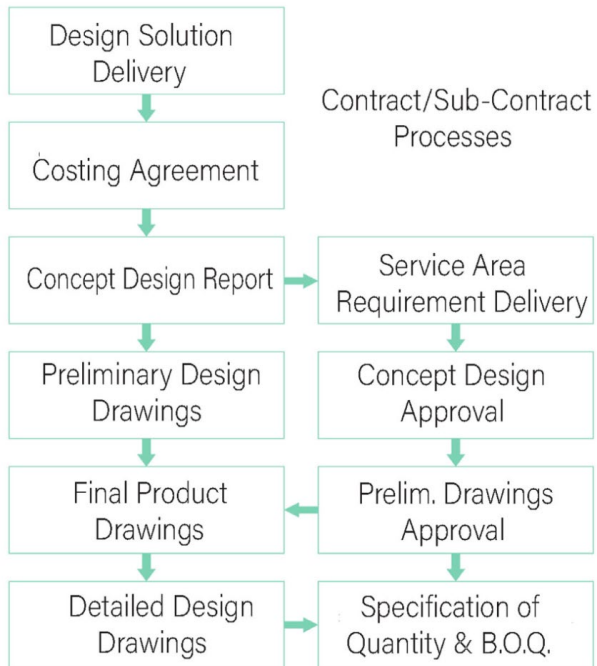

Wind Farm

OUR TEAM

Struggling to keep up with the current workload? Let Contrive Engineering assemble a team of engineers experts trained to work both remotely and in house selected to meet your specific requirements, whether for small jobs or large projects. Request a consultation now to explore our services.

WORKFLOW

Solar Panel

CORPORATE TRAINING SERVICES

Contrive Engineering can also support your corporate training needs. We offer the following customized courses:

- **CAD / CAM**
- **Electrical**
- **Mechanical Maintenance**
- **Stress Analysis**

Installation Solar Panel

OUR NEW IDEAS FOR PREVENTION

Preventive and corrective maintenance for high voltage distribution lines with UAV (unmanned aerial vehicle)

Visual check of lines for condition and review of pruning needs.

Thermal camera for hot spot detection.

Line washing requirements

Capacitor bank maintenance plan

Contrive Engineering 2022

INDUSTRIAL SUPPLIES

Our Online Training and Support department (corporate training services) prepares tailor-made courses in subjects such as CAD/CAM software, mechanical, electrical and stress engineering according to the needs of our customers.

Contrive Engineering Ltd Made Smarter Innovation
