ABOUT COMPANY

Upcoming challenges for which Contrive Engineering is seeking to collaborate with researchers from diverse backgrounds, including companies, and other institutions, to establish a working partnership.

Contrive Engineering is dedicated to advancing communication methods and promoting the sustainability of our planet.

Our goal is to stimulate the production of a cleaner energy supply with zero carbon emissions.

**“ Other Specific Service Facilities can be Provided
If and When Needed.”**

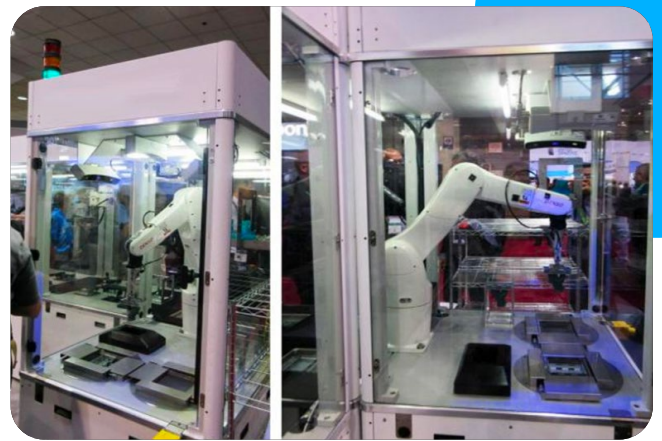

Lithium Cadmium Batteries

We are open to have an association to seek collaboration with companies and investors who share this vision and aim to expedite the practical advancement of this technologies to complement our in-house application.

OUR COMMITMENT

As lithium cadmium batteries as a propulsion source become obsolete, Contrive Engineering seeks a collaborative partner from companies, and other institutions, to develop a clean and safe disposal/recycling method for used batteries.

Company Values and Code of Ethics

a) Honesty:

Considered a fundamental moral value, honesty establishes internal interpersonal relationships among the members of the organization based on trust, sincerity, and mutual respect.

b) Trust:

Defined as the confidence in fulfilling our commitments to our clients, taken seriously and responsibly.

c) Respect:

Regarded as an essential value that enables us to build trusting relationships with our clients, serving as a vital condition for effective communication and successful results.

d) Service Attitude:

We strive every day to meet our clients' needs, addressing these requirements in terms of time, cost, and quality.

e) Teamwork:

We work toward a shared goal and support each other in achieving it together.

f) Project Management:

We have interdisciplinary teams across various business areas with the experience necessary to ensure the successful development of a multitude of projects.

Company Values and Code of Ethics

Company Values and Code of Ethics

Contrive Engineering has secured partnership agreements to provide and oversee all aspects of engineering, support, manufacturing, and installation of sustainable energy resources.

Company Values and Code of Ethics

MANUFACTURING SERVICES

We eliminate subcontracting costs by applying his methodology. We have a large portfolio of manufacturing capabilities for different sectors and in all types of materials.

We are ISO9001:2015 certificated.

Intrustial Collaboration

Maintenance and Spare Parts for Tools

Manufacturing and Repair

Design, Manufacture and Assembly of Electrical Cabinets

PROJECTS

Along with Intrustial being able to guarantee COST, DEADLINE and QUALITY in engineering and manufacturing projects through his integration and logistic centres. His network has certifications that allow us to carry out turnkey projects for various sectors.

We can provide:

Routine maintenance to minimize downtime. Service visits planned weekly, monthly, quarterly or coinciding with company schedules. Engineers can be supplied on site for the project's jobs.

Management of Production and Maintenance Equipment and Assets

INDUSTRIAL SUPPLIES

They have agreements with manufacturers and distributors that allow us to offer industrial supplies at competitive prices. Their integration centres offer packaging and kits that can be fully traced using his software.

Design and Manufacturing of Fishing Parks

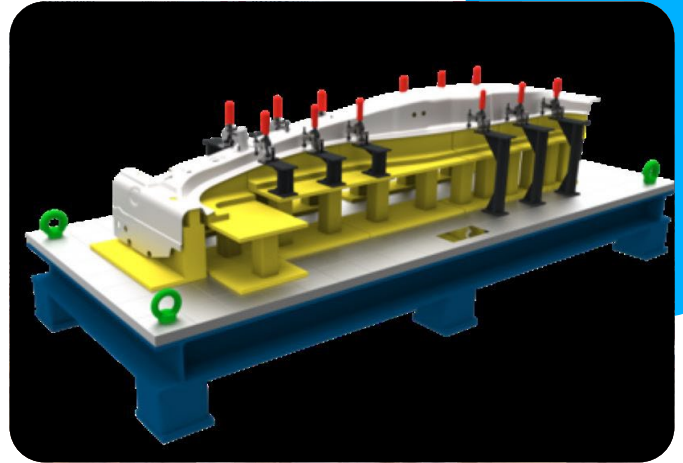

Supplies and Kits

A DIGITIZED NETWORK

His suppliers network uses his digital solutions and methodology free of charge. We offer customers a digitized supply network that guarantees COST, QUALITY and DEADLINE.

"Do you want to reduce purchasing costs and work with the best national and international suppliers, with a daily monitoring of orders, ensuring deadlines and quality?"
